Hawthorn Logistics: *The Strongest Link in Your Supply Chain*

What do you need from your freight forwarder?

From years of experience we know that your answer is likely to be one or all of the following.....

"We need to know where our cargo is, we don't want our customer contacting us to tell us there is a problem".

"We need clear, concise and timely communication".

"We need our freight forwarder to offer solutions, not tell us that they have a problem—they are the supposed experts".

"We want a freight forwarder who delivers a consistent service at cost efficient rates".

Hawthorn Logistics was founded by two long term professionals who have worked in the corporate world for more than 20 years. They fully understand the issues that drive customers and have developed their services around these needs.
